***RESTRICTION/ELECTION***

Restriction to one of the following inventions is required under 35 U.S.C. § 121:

- I. Claims 1-33, drawn to a method of forming slots, classified in class 216, subclass 27.
- II. Claims 34-38, drawn to a printing head, classified in Class 347, subclass 47.

Inventions I and II are unrelated. Inventions are unrelated if it can be shown that they are not disclosed as capable of use together and they have different modes of operation, different functions, or different effects (MPEP § 806.04, MPEP § 808.01). In the instant case, the invention I relates to the method of removing substrate material while the inventions II relate to a printing head assembly.

Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, restriction for examination purposes as indicated is proper.

Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement is traversed (37 CFR 1.143).
